OVERVIEW

The 800 MHz Transition Administrator, LLC ("TA") provides its Quarterly Progress Report to the Federal Communications Commission ("FCC") regarding the progress of the reconfiguration of the 800 MHz band for the quarter ended December 31, 2011. Pursuant to the FCC's *Reconfiguration Orders*, the TA, as the manager of the reconfiguration effort, is required to report on a quarterly basis the progress of band reconfiguration.²

The band reconfiguration program in non-border areas has consisted of two broad stages of activity: the clearing of 806-809 MHz/851-854 MHz (Channels 1-120)³ in Stage 1 and the relocation of Public Safety's NPSPAC channel users to this vacated spectrum in Stage 2. There are two phases of reconfiguration for each of these stages – the planning and negotiation phase that results in a Frequency Reconfiguration Agreement ("FRA") between the licensee and Sprint Nextel and the implementation phase that consists of the physical retuning of the radio system. The Canadian border reconfiguration is also occurring in two stages: Stage 1 is non-Public Safety and Stage 2 is Public Safety. The exact frequencies being reconfigured vary in each FCC-defined Canadian Border Region. Reconfiguration in the U.S.-Mexico border region is affected by ongoing international discussions between the United States and Mexico, and the Mexican border region band plan is under development.

Nearly all licensees in the program, except for those in the Mexican border region, have completed FRA negotiations, with 99 percent of the FRAs anticipated for such licensees submitted to the TA as of December 31, 2011. Physical retuning was complete for 83 percent of all FRAs, except for those in the Mexican border region, as of December 31, 2011. The main goal of the reconfiguration process – separating Public Safety and commercial cellular operations – has been achieved for a substantial number of licensees.

Reconfiguration of Non-Border Stage 1 Licensees

In non-border Stage 1 (Channels 1-120 and Southeast ESMR channels), 99 percent of the FRAs have been negotiated and submitted to the TA. Physical retuning is complete for 99 percent of the FRAs.

¹ Improving Public Safety Communications in the 800 MHz Band, Report and Order, Fifth Report and Order, Fourth Memorandum Opinion and Order, and Order, 19 FCC Rcd 14969 (2004), amended by Erratum, WT Docket No. 02-55 (rel. Sept. 10, 2004), Second Erratum, 19 FCC Rcd 19651 (2004), and Third Erratum, 19 FCC Rcd 21818 (2004) ("Report and Order"); Supplemental Order and Order on Reconsideration, 19 FCC Rcd 25120 (2004), amended by Erratum, WT Docket No. 02-55 (rel. Jan. 19, 2005) ("Supplemental Order"); Second Report and Order, 23 FCC Rcd 7605 (2008), amended by Erratum, WT Docket No. 02-55 (rel. May 28, 2008); Third Report and Order and Third Further Notice of Proposed Rulemaking, 25 FCC Rcd 4443 (2010) ("Third Report and Order"); Fourth Report and Order, 26 FCC Rcd 1937 (2011) (collectively "Reconfiguration Orders").

² See 47 C.F.R. § 90.676(b)(3).

³ The references herein to Channels 1-120 should be understood to reflect the pre-rebanding channelization of the 806-809 MHz/851-854 MHz band segment. Post-rebanding, this band segment is the NPSPAC band channelized into Channels 1-230.

Reconfiguration of Non-Border Stage 2 Licensees

With 99 percent of the FRAs for non-border Stage 2 (NPSPAC and Expansion Band) licensees submitted to the TA, the main activities for these licensees are occurring in the implementation phase. Non-border Stage 2 licensees retuned, reflashed, or replaced approximately 40,000 radios (first touches) in the fourth quarter, raising the total number to approximately 1,385,000 radios as of December 31, 2011. The percentage of non-border Stage 2 FRAs with physical retuning complete increased over the past year from 61 percent as of December 31, 2010 to 74 percent as of December 31, 2011.

Non-border licensees with executed FRAs that did not complete the physical reconfiguration of their systems by March 31, 2011 were required to request additional time from the FCC's Public Safety and Homeland Security Bureau ("PSHSB") by filing a supplemental request for waiver of the rebanding completion deadline. During the fourth quarter, the TA received 109 supplemental requests for waiver from non-border licensees that were filed with the PSHSB. On October 3, 2011, the PSHSB released an Order addressing non-border licensees' supplemental requests for waiver that were filed since December 30, 2010. The PSHSB separately addressed the waiver requests of licensees with executed FRAs and licensees without FRAs. The PSHSB granted waivers, in whole or in part, to licensees with executed FRAs. It granted a specific waiver date to each licensee, with January 17, 2012 as the latest waiver date granted. Licensees with executed FRAs that will not complete the physical reconfiguration of their systems by their waiver date granted by the PSHSB must request additional time by filing a supplemental request for waiver. In addition, the PSHSB held in abeyance the waiver requests of licensees without executed FRAs and directed such licensees to take further action.

Reconfiguration of Canadian Border Region Licensees

FRA negotiations for Canadian border Stage 1 (non-Public Safety) licensees are complete with 100 percent of the anticipated FRAs submitted to the TA. The percentage of Canadian border Stage 1 FRAs with physical retuning complete increased over the past year from 72 percent as of December 31, 2010 to 80 percent as of December 31, 2011.

Canadian border Stage 2 (NPSPAC and non-NPSPAC Public Safety) licensees continued to move forward with planning, negotiation, and implementation activities. The percentage of Canadian border Stage 2 FRAs submitted to the TA increased over the past year from 77 percent as of December 31, 2010 to 92 percent as of December 31, 2011. Several key licensees in Michigan and Ohio completed FRA negotiations during the fourth quarter, which will enable those licensees, and licensees whose implementation activities are dependent upon them, to proceed with their implementation work. Most of the remaining licensees without an FRA have negotiated a Planning Funding Agreement ("PFA") and are engaged in planning activities or

-

⁴ See Improving Public Safety Communications in the 800 MHz Band; Supplemental Requests for Waiver of the June 26, 2008 Rebanding Deadline, Order, 25 FCC Rcd 17776 (2010) ("December 2010 Waiver Order").

⁵ See Improving Public Safety Communications in the 800 MHz Band; Supplemental Requests for Waiver of the June 26, 2008 Rebanding Deadline, Order, 26 FCC Rcd 14162 (2011) ("October 2011 Waiver Order").

FRA negotiations. With regard to implementation, Canadian border Stage 2 licensees retuned, reflashed, or replaced approximately 6,000 radios (first touches) in the fourth quarter, raising the total number to approximately 42,000 radios as of December 31, 2011. The percentage of Canadian border Stage 2 FRAs with physical retuning complete increased over the past year from 25 percent as of December 31, 2010 to 32 percent as of December 31, 2011. During the first quarter of 2012, the TA conducted two Implementation Planning Sessions in NPSPAC Region 33: Ohio. At the sessions, the TA worked with licensees, vendors, and Sprint Nextel to develop a consolidated implementation schedule for the region that identifies key milestones and dependencies associated with reconfiguration implementation activities.

With the completion of FRA negotiations for many key licensees and the resolution of the frequency conflicts with Canadian stations, the TA expects to see an increase in the number of Canadian border licensees conducting subscriber unit and infrastructure retuning activities. Although some challenges remain that may impede progress in certain Canadian Border Regions, such as completing negotiations for the remaining FRAs, the TA anticipates that Canadian border licensees will make significant progress with their implementation activities in 2012.

Canadian border licensees that did not complete physical reconfiguration by April 14, 2011 were required to file a request for waiver of that deadline with the PSHSB by May 31, 2011, except for certain licensees for whom the requirement was tolled.⁶ During the fourth quarter of 2011, the TA received seven requests for waiver from Canadian border licensees that were filed with the PSHSB. On December 5, 2011, the PSHSB released an Order addressing Canadian Border Region licensees' requests for waiver. The PSHSB separately addressed the waiver requests of licensees with executed FRAs and licensees without FRAs. The PSHSB granted waivers, in whole or in part, to licensees with executed FRAs, granting a specific waiver date to each licensee. It granted the waiver dates requested by licensees that proposed to complete their rebanding by June 1, 2012. For licensees seeking extensions beyond June 1, 2012, the PSHSB granted partial waivers until June 1, 2012. The PSHSB granted waivers until December 3, 2012 to licensees with FRAs that cannot complete rebanding because a "downstream" licensee is blocking their replacement channels. Licensees with executed FRAs that will not complete the physical reconfiguration of their systems by their waiver date granted by the PSHSB must request additional time by filing a supplemental request for waiver. In addition, the PSHSB held in abeyance the waiver requests of licensees without executed FRAs and directed such licensees to take further action.

⁶ See "Public Safety and Homeland Security Bureau Provides Guidance for Submission of Requests for Waiver of the April 14, 2011 Deadline for Completion of 800 MHz Rebanding in Regions Along the U.S.-Canada Border," Public Notice, 26 FCC Rcd 5179 (2011) ("Canadian Border Waiver Request Public Notice").

⁷ See Improving Public Safety Communications in the 800 MHz Band; Requests for Waiver of the April 14, 2011 Rebanding Deadline in Regions Along the U.S.-Canada Border, Order, 26 FCC Rcd 16382 (2011) ("December 2011 Waiver Order").

Reconfiguration of Mexican Border Licensees

Although the band plan for the U.S.-Mexico border region is still under development, Mexican border licensees can take actions to prepare and plan for reconfiguration. The FCC has encouraged Wave 4 licensees in the U.S.-Mexico border region to engage in planning and negotiation activities to the extent that they are not frequency-dependent and would not result in unnecessary duplication of costs. Mexican border licensees should consider conducting the following non-frequency-dependent activities: submitting a Point of Contact Form to the TA, identifying vendors and consultants to assist with reconfiguration, conducting subscriber unit inventory, conducting infrastructure inventory, engaging in non-frequency-specific engineering and implementation planning, and defining their interoperability environment. If a licensee requires funding to conduct planning activities, it should submit a Request for Planning Funding ("RFPF") to the TA and negotiate a PFA with Sprint Nextel. Licensees may submit an RFPF prior to receiving replacement frequencies. The TA encourages larger licensees in particular to get an early start on their planning activities.

Reconfiguration of Puerto Rico Licensees

The 18-month transition period for reconfiguration of licensees in Puerto Rico began on September 20, 2010 and ended on March 19, 2012. The percentage of FRAs for Puerto Rico licensees that must be reconfigured from 816.5-821/861.5-866 MHz that were submitted to the TA increased over the past year from 0 percent as of December 31, 2010 to 86 percent as of December 31, 2011. Physical retuning was complete for 14 percent of these FRAs as of December 31, 2011.

All of the NPSPAC licensees in Puerto Rico have negotiated and submitted FRAs to the TA. Physical retuning was complete for 33 percent of Puerto Rico NPSPAC FRAs as of December 31, 2011.

Puerto Rico licensees that did not complete physical reconfiguration by March 19, 2012 were required to file a request for waiver of that deadline with the PSHSB by March 19, 2012. Such licensees were required to detail their progress to date and propose milestone dates for completing each major reconfiguration step (*e.g.*, subscriber unit deployment, infrastructure retuning, system cut-over, and post-cutover modifications) that has not been completed. Licensees should use the TA's Request for Waiver template in preparing their requests for waiver. Licensees should email requests for waiver to the PSHSB at PSHSB800@fcc.gov and provide copies to the TA at Waivers@800TA.org and to Sprint Nextel at 800MHZ@sprint.com.

⁸ See "Public Safety and Homeland Security Bureau Extends 800 MHz Rebanding Negotiation Period for Wave 4 Border Area NPSPAC and Non-NPSPAC Licensees Along the U.S.-Mexico Border," *Public Notice*, 26 FCC Rcd 17127 (2011) ("Mexican Border Public Notice").

⁹ The template is available on the TA's website at http://www.800TA.org/content/resources/forms.asp.

Closing Process

Licensees and Sprint Nextel must complete closing activities in a timely manner. Failure to do so can result in significant program delays, lost or misplaced actual cost support documentation, and other issues that could substantially impact amounts owed by or due to Sprint Nextel. To the extent that licensees are unable to appropriately document costs (as specified in the TA's published guidance), this can result in either delayed payments to licensees or refunds due from licensees to Sprint Nextel.

Closing process activities include modification of FCC licenses, equipment reconciliation, Actual Cost Reconciliation ("ACR"), and the preparation, execution, and delivery of the closing documents, including an FRA Completion Certification. ACR, which includes the true-up of cost support documentation with the estimated costs in the FRA and reconciliation of payments made or to be made by Sprint Nextel, is the last significant milestone in the reconfiguration process before execution of the closing documents.¹⁰

The TA continues to observe delay in the closing process. For those FRAs that have closed, the average time to close the FRA after completion of physical reconfiguration activities is 11.7 months. For those licensees that have completed physical reconfiguration activities but have not closed the FRA as of December 31, 2011, an average of 20.9 months has elapsed since the completion of physical reconfiguration activities. The TA notes that of the 333 FRAs in the closing process as of December 31, 2011, 221 FRAs (66.4 percent) are in the ACR process. Of those, 77 FRAs (34.8 percent) are aged greater than 12 months, while the rest have been in the ACR process for less than a year.

The TA encourages licensees and Sprint Nextel to expeditiously complete ACR and other closing activities. Licensees should document costs as they are incurred and not wait until after the completion of physical retuning to begin the required documentation of costs. Licensees and Sprint Nextel should complete ACR and other closing activities in accordance with the timeframes established in the Actual Cost Reconciliation Fact Sheet. The TA monitors the closing process and will continue to track a licensee's reconfiguration until it has completed the closing process and submitted an FRA Completion Certification.

¹⁰ Licensees are required to maintain cost support documentation for a minimum of 18 months after the closing of the FRA.

¹¹ The completion of all physical reconfiguration activities includes the completion of physical retuning and, where applicable, completion of the "second touch." The completion of physical retuning means the individual licensee has retuned its infrastructure to operate on its replacement frequencies and has cleared its old frequencies. Completion of the "second touch" means that the licensee, if provided for in the FRA, has completed a second (or subsequent) touch of its subscriber units to remove the pre-rebanding channels.

¹² The Fact Sheet is available at http://www.800TA.org/content/resources/ACR Fact Sheet.pdf.

I. PROGRAM-WIDE SNAPSHOT AND RECENT DEVELOPMENTS

This section provides a program-wide snapshot that summarizes the status of the 800 MHz band reconfiguration program. It describes two measures of program progress: Frequency Reconfiguration Agreement negotiations and reconfiguration implementation. It also discusses recent developments in the program, identifies program-wide issues, and, where applicable, describes specific actions that the FCC and the TA have taken to address issues identified to date.

A. Program Wide Snapshot

1. Frequency Reconfiguration Agreement Negotiations

The TA generally measures the progress of Frequency Reconfiguration Agreement negotiations in two ways: (1) the number of *FRAs* that have been negotiated and agreed to between licensees and Sprint Nextel and submitted to the TA; and (2) the number of *call signs* included in those FRAs.

An FRA specifies the reconfiguration activities and related costs for each licensee as well as the frequencies to be cleared. The bar chart below depicts the number of non-border FRAs that have been negotiated and submitted to the TA for Stage 1 (Channels 1-120 and Southeast ESMR channels) licensees and Stage 2 (NPSPAC and Expansion Band) licensees.

Chart 1: Non-border FRAs Submitted to the TA as of December 31, 2011¹³

- Stage 1: 99 percent of non-border FRAs have been submitted to the TA
- Stage 2: 99 percent of non-border FRAs have been submitted to the TA

¹³ Sprint Nextel is the data source for the number of expected FRAs. The estimate of total FRAs expected does not include FRAs for licensees affected by the international border areas for Canada and Mexico.

Chart 2 shows the number of Canadian Border Region FRAs that have been negotiated and submitted to the TA for Stage 1 (non-Public Safety) licensees and Stage 2 (NPSPAC and non-NPSPAC Public Safety) licensees.

Chart 2: Canadian Border FRAs Submitted to the TA as of December 31, 2011¹⁴

- Stage 1: 100 percent of Canadian border FRAs have been submitted to the TA
- Stage 2: 92 percent of Canadian border FRAs have been submitted to the TA

Chart 3 shows the number of call signs with frequencies in the Channels 1-120 and NPSPAC bands included in FRAs submitted to the TA.

¹⁴ Sprint Nextel is the data source for the number of expected FRAs. Subscriber Equipment Deployment ("SED") agreements are counted as submitted FRAs in this chart.

Chart 3: Call Signs in Submitted FRAs by Band¹⁵

Chart 3 includes non-border call signs and call signs within the Canadian and Mexican border regions. The number of outstanding Channels 1-120 call signs not yet in FRAs reflects the material number of call signs to be reconfigured that are located in, or affected by, the Canadian and Mexican border areas. For NPSPAC call signs, the difference is again the border factor (both Canadian and Mexican), as well as an indication that a number of the outstanding non-border FRAs are for large systems with multiple call signs.

2. Reconfiguration Implementation

The TA generally measures the status of reconfiguration implementation, or physical retuning, in two ways: (1) the number of *FRAs* for which physical retuning is complete; and (2) the number of *call signs* that Sprint Nextel reports as being cleared by licensees.¹⁶

Chart 4 depicts the number of non-border FRAs for Stages 1 and 2 licensees for which Sprint Nextel has reported that physical retuning is complete.

¹⁵ Data is based on the FCC's Universal Licensing System ("ULS") database. This chart does not include Expansion Band call signs.

¹⁶ As used in the context of implementation, the completion of physical retuning means the individual licensee has retuned its infrastructure to operate on its replacement frequencies and has cleared its old frequencies. The licensee may need to complete a second (or subsequent) touch of its subscriber units to remove the pre-rebanding channels. Cleared means that the licensee has retuned its base stations to its new channel assignments and commenced system operations on the new channels. Maps 2 and 3 and Appendix 2 have information on clearing by call sign.

Chart 4: Non-border FRAs with Physical Retuning Complete as of December 31, 2011

With physical retuning complete for 99 percent of non-border Stage 1 FRAs, Channels 1-120 clearing is nearly complete. Furthermore, 85 percent of the Stage 1 Channels 1-120 site-specific call signs were reported by Sprint Nextel as being cleared by licensees as of December 31, 2011. The difference between the percentages of *call signs* and *FRAs* is attributable to the fact that the FRA statistics do not include agreements in border areas, while the call sign statistics do include call signs in border areas.

NPSPAC system reconfigurations often involve complex system designs and interoperability requirements among numerous licensees in a region and generally require more time and coordination than was needed for Stage 1 systems. As of December 31, 2011, the licensees in 74 percent of non-border Stage 2 FRAs had completed their physical retunes and transitioned to their new channels. Furthermore, 50 percent of Stage 2 call signs were reported by Sprint Nextel as being cleared by licensees as of December 31, 2011. The difference between the percentages of *call signs* and *FRAs* is attributable to the fact that the FRA statistics do not include agreements in border areas, while the call sign statistics do include call signs in border areas. The retuning of base stations to a licensee's new channel assignments and commencement of system operations on the new channels is a significant milestone because it means that the main goal of the reconfiguration process – separating Public Safety and commercial cellular operations – has been achieved.

Chart 5 shows the number of Canadian Border Region FRAs for Stages 1 and 2 licensees for which Sprint Nextel has reported that physical retuning is complete.

Chart 5: Canadian Border FRAs with Physical Retuning Complete as of December 31, 2011

Physical retuning was complete for 80 percent of Canadian border Stage 1 FRAs as of December 31, 2011.

As with non-border NPSPAC licensees, reconfiguration of Canadian border Stage 2 licensees often involves complex system designs and interoperability requirements among numerous licensees in a region and generally requires more time and coordination than is needed for Stage 1 reconfiguration. Furthermore, certain Stage 1 licensees need to complete their physical retuning in order to clear replacement channels for NPSPAC licensees. As of December 31, 2011, the licensees in 32 percent of Canadian border Stage 2 FRAs had completed their physical retunes and transitioned to their new channels.

B. Recent Developments

1. Certifications of Completion of Band Reconfiguration

On December 6, 2011, the TA certified that band reconfiguration is complete in NPSPAC Region 2: Alaska, NPSPAC Region 22: Minnesota, and NPSPAC Region 32: North Dakota pursuant to the requirements in the *Report and Order* and the FCC's rules. ¹⁷ The TA has certified that band reconfiguration is complete in six NPSPAC regions. The certifications mean that all licensees in the regions that were subject to reconfiguration have relocated to their new channels and modified their FCC licenses to delete their old frequencies or cancelled their

_

¹⁷ See 800 MHz Transition Administrator, LLC, "Certification of Completion of Band Reconfiguration in NPSPAC Region 2: Alaska," WT Docket No. 02-55 (filed Dec. 6, 2011); 800 MHz Transition Administrator, LLC, "Certification of Completion of Band Reconfiguration in NPSPAC Region 22: Minnesota," WT Docket No. 02-55 (filed Dec. 6, 2011); 800 MHz Transition Administrator, LLC, "Certification of Completion of Band Reconfiguration in NPSPAC Region 32: North Dakota," WT Docket No. 02-55 (filed Dec. 6, 2011).

licenses. This also includes modifications to Sprint Nextel's network and licenses to cease operations below the ESMR band and modify or cancel all relevant licenses to remove any authority to operate below the ESMR band. Furthermore, all of the frequencies in all 800 MHz sub-bands (*i.e.*, NPSPAC, Interleaved, Expansion, Guard, and ESMR bands) in the regions that were subject to reconfiguration have been cleared. The certifications do not mean that licensees have completed all tasks associated with rebanding. Licensees in the regions still may need to complete a second (or subsequent) touch of their subscriber units to remove the pre-rebanding channels, submit final reconfiguration cost documentation to Sprint Nextel and/or the TA, complete the Actual Cost Reconciliation process, or close their FRAs in order for them to complete their individual reconfiguration activities.

2. Financial True-Up Date

On November 15, 2011, the TA filed a report with the PSHSB recommending that the 800 MHz reconfiguration financial reconciliation "true-up" deadline be extended from December 31, 2011 until June 30, 2012. After noting that there has been an increase in the 800 MHz reconfiguration expenditures since June 2011, the TA stated that a true-up as of December 31, 2011 would not encompass a significant amount of Sprint Nextel's reconfiguration expenditures. The TA stated that "additional rebanding expenditures are required to provide a meaningful report of Sprint Nextel's total rebanding costs for both the 800 MHz rebanding and for the relocation of BAS licensees." The TA proposed to file a report with the PSHSB by May 15, 2012 with its recommendation: (1) whether reconfiguration has made sufficient progress that conducting the true-up as of June 30, 2012 would be appropriate; or (2) whether the "true-up" deadline should be extended for an additional period.

On December 9, 2011, the PSHSB released an Order postponing the true-up date from December 31, 2011 until July 2, 2012. The PSHSB required the TA to file a report by May 15, 2012 with its recommendation on whether the true-up should be conducted as of July 2, 2012 or be further postponed. In the event that the true-up is conducted based on expenditures as of July 2, 2012, the PSHSB directed the TA to submit its final true-up report by December 31, 2012.

3. Requests for Waiver of Rebanding Completion Deadline

a. Non-border licensees

Non-border licensees with executed FRAs that did not complete the physical reconfiguration of their systems by March 31, 2011 were required to request additional time from the PSHSB by filing a supplemental request for waiver of the rebanding completion deadline. Affected licensees filed supplemental requests for waiver with the PSHSB and were

¹⁸ See Letter from Brett S. Haan, TA, to David L. Furth, PSHSB, WT Docket No. 02-55 (filed Nov. 15, 2011).

²¹ See December 2010 Waiver Order at ¶ 5.

directed to provide copies of the filings to the TA and Sprint Nextel. During the fourth quarter, the TA received 109 supplemental requests for waiver from non-border licensees that were filed with the PSHSB.²²

On October 3, 2011, the PSHSB released an Order addressing non-border licensees' supplemental requests for waiver of the rebanding completion deadline that were filed since December 30, 2010. The PSHSB granted waivers, in whole or in part, to licensees with executed FRAs. It granted a specific waiver date to each licensee, with January 17, 2012 as the latest waiver date granted. For licensees seeking extensions beyond January 17, 2012, the PSHSB granted partial waivers until January 17, 2012 for licensees to either complete reconfiguration or file a supplemental request for waiver at that time. The PSHSB directed licensees with executed FRAs that did not file a supplemental request for waiver or that filed a waiver request in which the requested extension date has passed to either provide the TA with documentation showing they have completed reconfiguration or file a supplemental request for waiver by November 2, 2011.

The PSHSB held in abeyance the waiver requests of licensees without executed FRAs and directed such licensees to take further action. The PSHSB directed licensees that have submitted a cost estimate, but have not executed an FRA, to either execute an FRA by December 19, 2011 or submit to the TA a report regarding the status of FRA negotiations, including a schedule for completing negotiations and a brief summary of the issues in dispute. Within 30 days of executing an FRA, such licensees must file a supplemental waiver request. The PSHSB directed licensees without a cost estimate to either submit a cost estimate by December 2, 2011 or provide the TA with a report explaining why they cannot provide a cost estimate, together with a schedule detailing when they anticipate submitting a cost estimate.

Non-border licensees with executed FRAs that will not complete the physical reconfiguration of their systems by their waiver date granted by the PSHSB must request additional time from the PSHSB by filing a supplemental request for waiver at that time. Such licensees will be required to detail their progress to date and propose milestone dates for completing each major reconfiguration step (*e.g.*, subscriber unit deployment, infrastructure retuning, system cut-over, and post-cutover modifications) that has not been completed. Licensees should use the TA's Request for Waiver template in preparing their supplemental requests for waiver. Licensees should email supplemental requests for waiver to the PSHSB at PSHSB800@fcc.gov. Licensees must provide copies of the requests to the TA at Waivers@800TA.org and to Sprint Nextel at 800MHZ@sprint.com.

²² The TA has created a webpage that provides information on the requests for waiver received by the TA. The link to this page can be found on the TA's website at http://www.800TA.org/content/resources/tools.asp.

²³ See October 2011 Waiver Order.

²⁴ The template is available on the TA's website at http://www.800TA.org/content/resources/forms.asp.

b. Canadian Border Region Licensees

Canadian Border Region licensees that did not complete physical reconfiguration by April 14, 2011 were required to file a request for waiver of that deadline with the PSHSB by May 31, 2011, except for certain licensees for whom the requirement is tolled.²⁵ Affected licensees filed requests for waiver with the PSHSB and were directed to provide copies of the filings to the TA and Sprint Nextel. During the fourth quarter, the TA received seven requests for waiver from Canadian Border Region licensees that were filed with the PSHSB.

On December 5, 2011, the PSHSB released an Order addressing Canadian Border Region licensees' requests for waiver. The PSHSB separately addressed the waiver requests of licensees with executed FRAs and licensees without FRAs. The PSHSB granted waivers, in whole or in part, to licensees with executed FRAs, granting a specific waiver date to each licensee. It granted the waiver dates requested by licensees that proposed to complete their rebanding by June 1, 2012. For licensees seeking extensions beyond June 1, 2012, the PSHSB granted partial waivers until June 1, 2012. The PSHSB granted waivers until December 3, 2012 to licensees with FRAs that cannot complete rebanding because a "downstream" licensee is blocking their replacement channels. Licensees with executed FRAs that will not complete the physical reconfiguration of their systems by their waiver date granted by the PSHSB must request additional time by filing a supplemental request for waiver.

The PSHSB held in abeyance the waiver requests of licensees without executed FRAs and directed such licensees to take further action. The PSHSB directed licensees that have submitted a cost estimate, but have not executed an FRA, to either execute an FRA by February 21, 2012 or submit to the TA a report regarding the status of FRA negotiations, including a schedule for completing negotiations and a brief summary of the issues in dispute. Within 30 days of executing an FRA, such licensees must file a supplemental waiver request. The PSHSB directed licensees without a cost estimate to either submit a cost estimate by February 3, 2012 or provide the PSHSB with a report explaining why they cannot provide a cost estimate, together with a schedule detailing when they anticipate submitting a cost estimate.

4. Vacated Interleaved Band Channels and NPSPAC Clearing

The FCC tasked the TA with monitoring the NPSPAC clearing process in its October 30, 2008 Order. Sprint Nextel cleared channels in the 809-809.5/854-854.5 MHz band in non-border NPSPAC regions, and this spectrum was made available to Public Safety licensees, beginning on January 28, 2009. Based on additional clearing of channels in the old NPSPAC

²⁷ See Improving Public Safety Communications in the 800 MHz Band; Relinquishment By Sprint Nextel of Channels in the Interleaved, Expansion, and Guard Bands, Order, 23 FCC Rcd 15966 ¶ 18 (2008) ("October 2008 Interleaved Order").

²⁵ See Canadian Border Waiver Request Public Notice.

²⁶ See December 2011 Waiver Order.

²⁸ See "Public Safety and Homeland Security Bureau Announces Application and Licensing Procedures for Channels Relinquished by Sprint Nextel Corporation in the 809-809.5/854-854.5 MHz Band," *Public Notice*, 23 FCC Rcd 18343 (2008).

band in certain NPSPAC regions, channels in the 809.5-815/854.5-860 MHz band in certain NPSPAC regions were relinquished by Sprint Nextel and made available to Public Safety licensees starting on December 2, 2009 and additional channels were made available on December 16, 2010.²⁹ Additional locations were made available on June 1, 2011.³⁰

The FCC's *October 2008 Interleaved Order* also required Sprint Nextel to relinquish all of its non-border spectrum in the interleaved band (809-815/854-860 MHz) by March 31, 2010. Sprint Nextel filed a request for waiver, ³¹ and the PSHSB, in a March 31, 2010 Order, extended the deadline for Sprint Nextel to vacate the interleaved band until March 31, 2011 in the 21 regions for which Sprint Nextel sought relief. ³² The PSHSB also required Sprint Nextel to relinquish "Stage 2" channels (809.5-810.5/854.5-855.5 MHz) in the 21 regions "on an accelerated basis, by lowering the threshold for Stage 2 clearing from 25 percent to 10 percent." Sprint Nextel filed a further request for waiver, ³⁴ and the PSHSB, in a March 31, 2011 Order, extended the deadline for Sprint Nextel to vacate the interleaved band until March 31, 2012 in the nine regions for which Sprint Nextel sought further relief. ³⁵

As NPSPAC licensees modify their licenses to clear channels in the old NPSPAC band and reach certain clearing benchmarks in certain regions, Sprint Nextel will vacate additional interleaved band spectrum in those regions. The TA is monitoring the clearing of channels in the old NPSPAC band. During the fourth quarter, nine NPSPAC regions showed increased clearing,

²⁹ See "Public Safety and Homeland Security Bureau Announces Application and Licensing Procedures for Certain Channels Relinquished by Sprint Nextel Corporation in the 809.5-815/854.5-860 MHz Band," *Public Notice*, 24 FCC Rcd 13236 (2009); see also "Public Safety and Homeland Security Bureau Announces Application and Licensing Procedures for Certain Channels Relinquished by Sprint Nextel Corporation in the 809.5-815/854.4-860 MHz Band," *Public Notice*, 25 FCC Rcd 16038 (2010).

³⁰ See "Public Safety and Homeland Security Bureau Announces the Opening of Filing Window for Additional Locations Relinquished by Sprint Nextel Corporation in the 809.5-815/854.4-860 MHz Band Segment," *Public Notice*, 26 FCC Rcd 6639 (2011).

³¹ On January 27, 2010, Sprint Nextel filed a request for waiver of the March 31, 2010 deadline in 21 NPSPAC regions and proposed to relinquish additional interleaved channels in those regions in accordance with the thresholds for staged interleaved spectrum clearing set forth in the FCC's *October 2008 Interleaved Order*. *See* Letter from Lawrence R. Krevor, Sprint Nextel Corporation, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 02-55 (filed Jan. 27, 2010).

³² See Improving Public Safety Communications in the 800 MHz Band; Relinquishment By Sprint Nextel of Channels in the Interleaved, Expansion, and Guard Bands, Order, 25 FCC Rcd 3270 (2010) ("March 31, 2010 Interleaved Order").

 $^{^{33}}$ *Id.* at 3274 ¶ 14.

³⁴ On February 11, 2011, Sprint Nextel filed a request for waiver seeking an extension of the March 31, 2011 deadline in nine NPSPAC regions and proposing to relinquish additional interleaved channels in those regions in accordance with the thresholds for staged interleaved spectrum clearing set forth in the FCC's Orders. *See* Letter from Lawrence R. Krevor, Sprint Nextel Corporation, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 02-55 (filed Feb. 11, 2011).

³⁵ See Improving Public Safety Communications in the 800 MHz Band; Relinquishment By Sprint Nextel of Channels in the Interleaved, Expansion, and Guard Bands, Order, 26 FCC Rcd 5004 (2011) ("March 31, 2011 Interleaved Order").

with two advancing to a higher stage.³⁶ Map 1 contains information about the status of clearing of channels in the old NPSPAC band in each region.

Map 1: NPSPAC Clearing Progress as of December 31, 2011³⁷

Additional information is available in Appendix 2.

³⁶ The two NPSPAC regions achieving a higher stage through additional clearing are Region 8: New York - Metropolitan (from Stage 2 to 3) and Region 40: Texas - Dallas (from Stage 2 to 3). In addition, seven other regions increased clearing without moving to a higher stage. Notable among these were Region 10: Georgia with an 11 percent increase and Region 39: Tennessee with a 13 percent increase.

³⁷ The percentages for the stages noted in Map 1 were modified by the FCC's *March 31, 2010 Interleaved Order* and the data in the map reflects the new percentages and stages. Pursuant to that Order and the FCC's *March 31, 2011 Interleaved Order*, certain NPSPAC regions were classified as Stage 5 without regard to the percentage of actual clearing of NPSPAC channels. Appendix 2 contains a map that shows stages based on actual clearing of NPSPAC channels.

5. U.S.-Mexico Border Region

The band plan for the U.S.-Mexico border region is still under development. Rebanding of Wave 4 licensees in the U.S.-Mexico border region is affected by ongoing international discussions with Mexico. Accordingly, the PSHSB issued a Public Notice on December 29, 2011, modifying the schedule for non-NPSPAC (Stage 1) and NPSPAC (Stage 2) licensees in the U.S.-Mexico border region. The PSHSB extended the negotiation period until April 2, 2012 and postponed the start of the mediation period until April 3, 2012 for such licensees. The PSHSB also extended the filing freeze on new applications in the U.S.-Mexico border region until May 14, 2012. Extending the negotiation period for these licensees is expected to alleviate administrative burdens on licensees, avoid unnecessary rebanding expenditures, and provide additional time for resolution of border issues and issuance of frequency designations by the TA. The extension of negotiations and the application freeze does not apply to Wave 4 licensees along the U.S.-Mexico border that have received proposed replacement frequencies from the TA.

During the extended negotiation period, the FCC has encouraged Wave 4 licensees affected by the Mexican border region to engage in planning and negotiation activities to the extent that they are not frequency-dependent and would not result in unnecessary duplication of costs. Licensees should consider conducting the following non-frequency-dependent activities: submitting a Point of Contact Form to the TA, identifying vendors and consultants to assist with reconfiguration, conducting subscriber unit inventory, conducting infrastructure inventory, engaging in non-frequency-specific engineering and implementation planning, and defining their interoperability environment. If planning funding is required, licensees should submit a Request for Planning Funding ("RFPF") to the TA and negotiate a PFA with Sprint Nextel. Licensees may submit an RFPF prior to receiving replacement frequencies. As of December 31, 2011, 15 PFAs, with a total contract value, including amendments, of \$6.5 million, were approved by the TA for licensees in or adjacent to the Mexican border region. In addition, as of December 31, 2011, the TA had approved SED agreements and FRAs with a total contract value, including amendments, of \$10.9 million for licensees in or adjacent to the Mexican border region.

³⁸ See Mexican Border Public Notice.

³⁹ See id

⁴⁰ The agreements do not include frequency-dependent activities.

II. QUARTERLY UPDATE

This section highlights the key areas within each stage and provides financial and support information about the program.

A. <u>Update by Stage and Wave</u>

The status of implementation for Stage 1 systems has a direct effect on the pace of reconfiguration for Stage 2 systems. Stage 1 licensees must be relocated off their frequencies in the lower 1-120 channel portion of the 800 MHz band before Stage 2 NPSPAC licensees can move to their new frequencies in that portion of the 800 MHz band. This interdependency of reconfiguration progress between Stages 1 and 2 is consistent across all four waves.

1. Stage 1 (Channels 1-120)

a. **Planning and Negotiations**

Most Stage 1 licensees included planning costs (if any) in their FRAs, but some negotiated Planning Funding Agreements with Sprint Nextel. As of December 31, 2011, 54 PFAs, with a total contract value, including amendments, of \$7.7 million, were approved by the TA for non-border Stage 1 licensees.

The negotiation of FRAs for non-border Stage 1 licensees is virtually completed. As of December 31, 2011, 913 FRAs (99 percent) have been submitted to the TA out of the 914 FRAs anticipated for non-border Stage 1 licensees. The TA has approved 913 FRAs with a contract value, including amendments, totaling \$82.5 million. Appendix 1A provides additional information about the status of FRA negotiations for non-border Channels 1-120 licensees.

In Stage 1, there were no mediation dockets (or "cases") pending as of December 31, 2011.

b. **Reconfiguration Implementation**

As of December 31, 2011, Sprint Nextel reported that physical retuning is complete for 906 non-border Stage 1 FRAs out of the 914 FRAs anticipated for Stage 1, which is 99 percent of non-border Channels 1-120 FRAs. Certain Public Safety licensees in Stage 1 have elected to retune their Stage 1 facilities along with their Stage 2 facilities.

As of December 31, 2011, 85 percent of the Stage 1 Channels 1-120 site-specific call signs were reported by Sprint Nextel as being cleared by licensees. The difference between the percentages of call signs and FRAs is due to the FRA statistics not including agreements in border areas, while the call sign statistics do include call signs in border areas, with the majority of outstanding call signs being in border-affected areas as shown in Map 2. As of December 31, 2011, there were 42 NPSPAC regions in which 100 percent of the Channels 1-120 call signs were cleared.

Map 2 shows the progress of clearing Channels 1-120 to allow relocation of the NPSPAC band, with material progress in all areas of the country outside the areas affected by international borders.

Map 2: Channels 1-120 Locations and Reconfiguration Status, by NPSPAC Region as of December 31, 2011⁴¹

2. <u>Stage 2 (NPSPAC and Expansion Band)</u>

a. **Planning and Negotiations**

In Stage 2, nearly half of the licensees sought planning funding and negotiated PFAs. As of December 31, 2011, 430 PFAs, with a total contract value, including amendments, of \$77.2 million, were approved by the TA for non-border Stage 2 licensees.

⁴¹ The licensee clearing information is provided by Sprint Nextel. Some regions adjacent to international borders will not reach 100 percent until revised border area band plans are available. Locations noted on the map are based upon ULS data regarding Channels 1-120 licensing as of November 2004.

During the fourth quarter of 2011, parties completed negotiations on and submitted to the TA one additional Stage 2 FRA. As shown in Table 1, as of December 31, 2011, 861 FRAs (99 percent) have been submitted to the TA out of the 863 FRAs anticipated for non-border Stage 2 licensees. The TA has approved 861 FRAs with a contract value, including amendments, totaling \$784.5 million. One of the remaining licensees without an FRA is in the process of negotiating an FRA with Sprint Nextel, and the other licensee has reached verbal agreement with Sprint Nextel, but has not yet executed an FRA.

Table 1: Status of Reconfiguration for Stage 2 (NPSPAC and Expansion Band) Licensees as of December 31, 2011 (milestones achieved by number of FRAs)⁴²

	Stage 2 Anticipated FRAs*	FRA Negotiations and Approval			Reconfiguration Implementation				
Wave		FRAs Submitted to TA	FRAs Approved by TA	% of Anticipated FRAs Approved by TA	# of FRAs with Physical Retunes Reported as Completed	% of Anticipated FRAs with Physical Retune Reported as Completed	Completion Certifications Submitted to TA	Completion Certifications Assessed by TA	% of Anticipated FRAs with Completion Certifications Assessed by TA
Wave 1	354	353	353	99%	247	70%	152	151	43%
Wave 2	226	226	226	100%	183	81%	99	97	43%
Wave 3	237	236	236	99%	173	73%	59	58	24%
Wave 4	46	46	46	100%	36	78%	19	19	41%
Total	863	861	861	99%	639	74%	329	325	38%

^{*} This table does not include any estimate of FRAs that will include call signs in or affected by the FCC-defined border areas.

Table 2 provides Stage 2 status information in terms of the number of call signs that have achieved particular milestones.

_

⁴² Sprint Nextel is the data source for the estimated number of anticipated FRAs in column 2 and the number of FRAs with physical retunes reported as completed in column 6. The figures have not been verified by the TA. Any changes to the number of anticipated FRAs from previous Quarterly Progress Reports are the result of how Sprint Nextel structures deals with licensees (*i.e.*, deals cancelled or consolidated). Given that some FRAs noted in the table are for licensees with mobile-only systems, there will be a difference between the number of FRAs and the number of FRAs reporting frequencies cleared.

Table 2: Status of Reconfiguration for Licensees in Stage 2 (NPSPAC and Expansion Band) as of December 31, 2011 (milestones achieved by number of call signs)

	u s 01 2 0	·	tiations and Ap		Reconfiguration Implementation				
Wave	Stage 2 Call Signs*	# in FRAs Submitted to TA	# in FRAs Approved by TA	% in FRAs Approved by TA	# Reported as Cleared by Licensee	% Reported as Cleared by Licensee	Completion Certifications Submitted to TA	Completion Certifications Assessed by TA	% with Completion Certifications Assessed by TA

^{*} Includes call signs in the FCC-defined international border areas.

(i) **Wave 1**

Wave 1, Stage 2 is the largest of the NPSPAC channel reconfiguration waves. As shown in Table 1 above, as of December 31, 2011, approximately 99 percent of the FRAs expected for Wave 1, Stage 2 have been approved by the TA.

The Wave 1, Stage 2 mediation period began on November 1, 2006. As of December 31, 2011, of the 337 mediation dockets opened for Wave 1, Stage 2 licensees, 336 mediation dockets had been resolved (an increase from 335 resolved as of September 30, 2011). The parties in the one remaining mediation docket had reached verbal agreement, but had not yet negotiated an FRA.

(ii) **Wave 2**

As shown in Table 1 above, as of December 31, 2011, 100 percent of the FRAs expected for Wave 2, Stage 2 have been approved by the TA. As of December 31, 2011, all of the 235 mediation dockets opened for Wave 2, Stage 2 licensees had been resolved.

(iii) Wave 3

Besides NPSPAC licensees, Wave 3, Stage 2 includes certain licensees with Southeast ESMR Band frequencies that were deferred from Wave 3, Stage 1 at the licensee's request. As shown in Table 1 above, as of December 31, 2011, approximately 99 percent of the FRAs expected for Wave 3, Stage 2 have been approved by the TA.

⁴³ Wave 3, Stage 1 licensees whose Wave 3 ESMR Negotiation Deferral Requests were granted in June 2006 had their negotiations and reconfiguration implementation deferred to Wave 3, Stage 2.

The Wave 3, Stage 2 mediation period began on May 1, 2007. As of December 31, 2011, of the 272 mediation dockets opened for Wave 3, Stage 2 licensees, 271 mediation dockets had been resolved (an increase from 270 resolved as of September 30, 2011). The licensee in the one mediation had submitted a cost estimate to, and was negotiating an FRA with, Sprint Nextel.

(iv) Wave 4

As shown in Table 1 above, as of December 31, 2011, 100 percent of the non-border area FRAs expected for Wave 4, Stage 2 have been approved by the TA. The expected FRAs for Wave 4, Stage 2 licensees with systems located in, or affected by, the international border areas with Canada and Mexico are not included in the FRA statistics for Wave 4. As of December 31, 2011, all of the 66 mediation dockets opened for non-border area Wave 4, Stage 2 licensees had been resolved.

b. **Reconfiguration Implementation**

Non-border Stage 2 licensees continue to make progress with their implementation activities.

(i) <u>Implementation Planning Sessions</u>

One of the TA's methods for facilitating implementation activities has been to conduct regional Implementation Planning Sessions ("IPS" or "sessions"). These sessions bring together Public Safety licensees, their equipment vendors, technical consultants, and Sprint Nextel to develop consolidated implementation schedules. The FCC requires licensees that have not completed reconfiguration to participate in IPS in their region, if offered.⁴⁴

During the sessions, the TA works with licensees to develop implementation schedules for the regions that identify key milestones and dependencies associated with reconfiguration implementation activities. The sessions help licensees adjust implementation schedules to deal with complicated interconnections and interdependencies of shared networks – particularly regarding setting dates for retuning mutual aid channels used by neighboring municipalities. IPS have also been successful in enabling parties to reach an understanding on the timing of clearing and surrendering frequencies for those licensees that are ready to transition to the new channels.

During the fourth quarter, the TA did not conduct any sessions; however, to date, the TA has held 45 IPS in 31 NPSPAC regions, which have been attended by 630 licensees, operating approximately 1.4 million radios.⁴⁵ Licensees that have participated in IPS should continue to

⁴⁴ See Improving Public Safety Communications in the 800 MHz Band; Supplemental Requests for Waiver of the June 26, 2008 Rebanding Deadline, Order, 24 FCC Rcd 7761, 7765 ¶ 9 (2009); see also "FCC Announces Supplemental Procedures and Provides Guidance for Completion of 800 MHz Rebanding," Public Notice, 22 FCC Rcd 17227, 17230 (2007) (stating that NPSPAC licensees "are expected to participate" in IPS).

⁴⁵ The TA conducted 19 IPS in Wave 1 NPSPAC regions attended by 202 licensees, 12 IPS in Wave 2 NPSPAC regions attended by 185 licensees, and 14 IPS in Wave 3 NPSPAC regions attended by 224 licensees.

move forward with and complete their implementation activities in accordance with the regional schedule developed at the session.

The TA will continue to hold IPS for NPSPAC regions in all waves, and follow-up sessions when needed. The TA is gathering and analyzing information to assess future IPS for Wave 4. The TA conducted two IPS in Region 33: Ohio during the first quarter of 2012. In some regions, the TA will hold a session to develop an initial regional schedule, with the understanding that follow-up IPS may be necessary. In a region where accelerating a session is not viable, or where the TA has determined that a session may not be necessary, the TA will communicate with licensees to document the interoperability environment, dependencies, and any other relevant issues and develop a regional schedule.

(ii) Reconfiguration of Subscriber Equipment

A key component of reconfiguration implementation is the retuning, reflashing, and/or replacement of subscriber equipment. Non-border Stage 2 licensees retuned, reflashed, or replaced approximately 40,000 radios (first touches) in the fourth quarter of 2011, raising the total number to approximately 1,385,000 radios (first touches) as of December 31, 2011.

(iii) <u>Infrastructure Retuning and System Cutover</u>

Another significant milestone in the implementation process is the retuning of base stations to the licensee's new channel assignments and commencement of system operations on the new channels. During the fourth quarter of 2011, there were an additional 35 non-border Stage 2 FRAs for which licensees reported their physical retunes as complete. Of the 863 FRAs expected for non-border Stage 2, there were 639 FRAs as of December 31, 2011 for which licensees had completed their physical retunes and transitioned to their new channels. This does not consider licensees with post-cutover subscriber unit second touches or other technical work. As of December 31, 2011, physical retuning was complete for 74 percent of non-border Stage 2 FRAs (an increase from 70 percent as of September 30, 2011).

As of December 31, 2011, 50 percent of Stage 2 call signs were reported by Sprint Nextel as being cleared by licensees, which includes call signs in the border areas. The difference between the numbers by percentages of call signs and FRAs is again due to the fact that the FRA statistics do not include agreements in border areas, while the call sign statistics do include border area call signs.

The following map graphically depicts NPSPAC reconfiguration progress, as of December 31, 2011, by licensed NPSPAC locations. Progress on Expansion Band clearing is detailed in Appendix 2.

Map 3: NPSPAC Locations and Reconfiguration Status, by NPSPAC Region as of December 31, 2011⁴⁶

3. Implementation Schedule Implications

In prior quarters, the TA identified certain NPSPAC regions where one or more key non-border licensees and Sprint Nextel had not yet reached agreement on an FRA, and where the resulting delay was impeding program progress and delaying implementation by other licensees within their region and, in some cases, outside their region due to interoperability and dependencies between licensees. Licensees in the two regions listed last quarter completed FRA negotiations during the fourth quarter. As of December 31, 2011, there are no non-border licensees without FRAs that are impeding program progress or delaying implementation of other licensees within or beyond their region.

_

⁴⁶ This map shows frequency clearing as reported by the licensee to Sprint Nextel. Licensees generally report clearing before they file license modifications to delete cleared frequencies. Map 1 reflects clearing based on ULS licensing data, which is the basis for determining the release of additional interleaved band spectrum by Sprint Nextel.

4. Canadian Border Regions

The 30-month transition period for reconfiguration of licensees in the U.S.-Canada border regions began on October 14, 2008.⁴⁷ The TA's Implementation Plan and Timetable for the Reconfiguration of the 800 MHz Band in the U.S.-Canada Border Regions ("Implementation Plan") established two stages for the reconfiguration of Canadian border licensees. Stage 1 includes non-Public Safety licensees, such as Business, Industrial and Land Transportation ("B/ILT") and Specialized Mobile Radio ("SMR") licensees. Stage 2 is comprised of both NPSPAC and non-NPSPAC Public Safety licensees. The Canadian border reconfiguration also includes clearing of channels in the 854-860 MHz range for Public Safety use and reconfiguration of frequencies in the 861-865 MHz range to separate ESMR systems into the higher portion of the band. The exact frequencies being reconfigured vary in each FCC-defined Canadian Border Region. The TA continued its efforts to support Canadian border region reconfiguration during the fourth quarter by using the mediation process to assist licensees and Sprint Nextel in negotiating FRAs and by addressing frequency issues raised by licensees.

Canadian Border Region licensees were required to complete reconfiguration by April 14, 2011. Licensee requests for waiver of this deadline were discussed in Section I.B.2.b. of this report.

a. Frequency Proposals

The TA's frequency planning activities in the Canadian border-affected area in the fourth quarter of 2011 continued to focus on addressing issues raised by licensees, such as combiner spacing or unique equipment limitations such as with vehicular repeater systems, and providing replacement frequencies for STAs granted after the initial frequency planning was completed. Additional information about Frequency Proposal Reports ("FPRs") is provided in Appendix 5.

b. **Planning**

As of December 31, 2011, 67 PFAs, with a total contract value, including amendments, of \$15.3 million, were approved by the TA for licensees in or adjacent to the Canadian Border Regions. After reaching agreement on a PFA, licensees and their vendors conduct planning activities, such as system inventory, frequency analysis, and development of a reconfiguration plan, and prepare a cost estimate for their reconfiguration. Licensees are required to complete planning and submit a cost estimate to Sprint Nextel within 90 to 110 days, depending on the number of subscriber units in their system, of the *later* of TA approval of the PFA or receipt of

⁴⁷ See "Public Safety and Homeland Security Bureau Announces that the 30-Month Transition Period for 800 MHz Band Reconfiguration in Regions Along the U.S.-Canada Border will Commence on October 14, 2008," *Public Notice*, 23 FCC Rcd 14877 (2008) ("Canadian Border Public Notice").

⁴⁸ See 800 MHz Transition Administrator, LLC, "Implementation Plan and Timetable for the Reconfiguration of the 800 MHz Band in the U.S.-Canada Border Regions," WT Docket No. 02-55 (filed Oct. 1, 2008), available at http://www.800TA.org/content/resources/Implementation Plan CBR 10.01.08.pdf, approved by Canadian Border Public Notice.

an FPR. If a licensee needs additional time to complete planning, it should request an extension from the PSHSB.

c. **Negotiations**

After a licensee submits a cost estimate to Sprint Nextel, the licensee and Sprint Nextel have 30 days for FRA negotiations. If they are unable to negotiate an FRA within the 30-day period, the parties actively participate in mediation for 20 days. Table 3 provides information about the status of FRA negotiations and approval for Canadian border licensees.

Table 3: Status of Reconfiguration for Canadian Border Licensees as of December 31, 2011 (milestones achieved by number of FRAs)⁴⁹

	Anticipated FRAs	FRA Negotiations and Approval			Reconfiguration Implementation				
Stage		FRAs Submitted to TA	FRAs Approved by TA	% of Anticipated FRAs Approved by TA	# of FRAs with Physical Retunes Reported as Completed	% of Anticipated FRAs with Physical Retune Reported as Completed	Completion Certifications Submitted to TA	Completion Certifications Assessed by TA	% of Anticipated FRAs with Completion Certifications Assessed by TA
Stage 1	75	75	75	100%	60	80%	52	52	69%
Stage 2	118	108	108	92%	38	32%	25	24	20%
Total	193	183	183	95%	98	51%	77	76	39%

Appendices 1B and 3B provide additional information about the status of FRA negotiations for Canadian border licensees.

(i) Stage 1

Most Canadian border Stage 1 licensees included planning costs (if any) in their FRAs. Seven Stage 1 licensees negotiated PFAs.

The negotiation and mediation period for Canadian border region Stage 1 licensees without a PFA began on January 12, 2009. As of December 31, 2011, all of the 129 mediation dockets opened for Stage 1 licensees had been resolved.

During the fourth quarter, parties submitted one additional Stage 1 FRA to the TA. As of December 31, 2011, 75 FRAs (100 percent) were submitted to the TA out of the 75 FRAs

_

⁴⁹ SED agreements are counted as submitted FRAs in this chart. Sprint Nextel is the data source for the estimated number of anticipated FRAs in column 2 and the number of FRAs with physical retunes reported as completed in column 6. The figures have not been verified by the TA. Any changes to the number of anticipated FRAs from previous Quarterly Progress Reports are the result of how Sprint Nextel structures deals with licensees (*i.e.*, deals cancelled or consolidated).

anticipated for Canadian border region Stage 1 licensees.⁵⁰ The TA has approved 75 Canadian Border Stage 1 FRAs with a contract value, including amendments, totaling \$12.0 million.

(ii) Stage 2

Approximately half of the Canadian border Stage 2 licensees submitted an RFPF and negotiated a PFA. Some of these licensees are currently engaged in activities to plan for their reconfigurations and prepare reconfiguration cost estimates, and many licensees have already submitted cost estimates and entered into or completed FRA negotiations with Sprint Nextel.

For Canadian border region Stage 2 licensees that do not require a PFA, the negotiation and mediation period began on April 15, 2009. After submitting a cost estimate, a licensee and Sprint Nextel had 30 days to negotiate an FRA under the monitoring of a TA mediator. If, at the end of the 30-day period, there was no agreement on an FRA, the licensee and Sprint Nextel actively participated in mediation for 20 days.

As of December 31, 2011, of the 156 mediation dockets opened for Stage 2 licensees, 146 mediation dockets had been resolved (an increase from 144 resolved as of September 30, 2011). The licensees in eight mediations had negotiated PFAs: two of these were in various stages of planning; four had submitted cost estimates to Sprint Nextel; and two had reached agreement with Sprint Nextel regarding, but had not yet executed, FRAs.

During the fourth quarter of 2011, parties completed negotiations on and submitted to the TA one additional FRA for a Stage 2 licensee. As of December 31, 2011, 108 FRAs (92 percent) were submitted to the TA out of the 118 FRAs anticipated for Canadian border region Stage 2 licensees. The TA has approved 108 FRAs with a contract value, including amendments, totaling \$96.7 million.

d. **Reconfiguration Implementation**

Canadian border licensees continue to make progress with their implementation activities.

(i) Stage 1

As of December 31, 2011, there were 60 Canadian border Stage 1 FRAs for which licensees had completed their physical retunes and transitioned to their new channels. As of December 31, 2011, physical retuning was complete for 80 percent of Canadian border Stage 1 FRAs. The map below shows the progress of Canadian border Stage 1 licensees.

⁵⁰ SED agreements are counted as submitted FRAs in this number.

Map 4: Canadian Border Region Stage 1 Clearing Progress

(ii) Stage 2

Reconfiguration of Stage 2 Public Safety licensees, often with complex system designs and interoperability requirements among numerous licensees in a region, requires more time and coordination than is needed for Stage 1 reconfiguration. Furthermore, certain Stage 1 licensees need to complete their physical retuning in order to clear replacement channels for Stage 2 licensees. Canadian border Stage 2 licensees retuned, reflashed, or replaced approximately 6,000 radios (first touches) in the fourth quarter, raising the total number to approximately 42,000 radios (first touches) as of December 31, 2011. During the fourth quarter, there were three additional Canadian border Stage 2 FRAs for which the licensee reported its physical retune as complete. As of December 31, 2011, there were 38 Canadian border Stage 2 FRAs for which licensees had completed their physical retunes and transitioned to their new channels. As of December 31, 2011, physical retuning was complete for 32 percent of Canadian border Stage 2 FRAs. The map below shows the progress of Canadian border Stage 2 licensees.

Map 5: Canadian Border Region Stage 2 Clearing Progress

5. Puerto Rico

The 18-month transition period for reconfiguration of licensees in Puerto Rico began on September 20, 2010 and ended on March 19, 2012.⁵¹ The PSHSB's *Third Report and Order* established three stages for reconfiguration in Puerto Rico. Stage 1 is the relocation of non-Public Safety licensees in Channels 1-120. In Stage 2, NPSPAC licensees relocate 15 MHz lower to the new NPSPAC band; high-site incumbent licensees relocate from the ESMR Band to the Interleaved Band; and Economic Area ("EA") and site-based ESMR licensees that are part of an EA Election relocate from the Interleaved, Expansion, and Guard Bands into the ESMR Band. There are two EA licensees that have made elections to move frequencies into the ESMR band. Stage 3 may include the relocation of the licenses of Preferred Communication Systems, Inc. and Preferred Acquisitions, Inc. ("Preferred") and, if necessary, *pro rata* apportionment of ESMR spectrum in accordance with the PSHSB's directions in the *Third Report and Order*. Pursuant to

_

⁵¹ See "Public Safety and Homeland Security Bureau Announces that the 18-Month Transition Period for 800 MHz Band Reconfiguration in Puerto Rico (Region 47) will Commence on September 20, 2010," *Public Notice*, 25 FCC Rcd 13110, 13113 (2010).

the FCC's direction, Preferred's reconfiguration is deferred pending the resolution of a pending show cause proceeding and Preferred's request for waiver of its 800 MHz construction obligations. ⁵²

The TA's Implementation Timetable for the Reconfiguration of the 800 MHz Band in Puerto Rico ("Implementation Timetable") set forth the timeframe and sequence for the reconfiguration of Puerto Rico licensees.⁵³ It established the timelines for affected licensees to file Guard Band Elections, submit cost estimates, negotiate FRAs, and complete implementation.

a. **Negotiations**

All of the NPSPAC licensees in Puerto Rico have negotiated and submitted FRAs to the TA. The 90-day mandatory negotiation period for the remaining high-site non-Public Safety incumbent licensees in Puerto Rico that must be reconfigured from the 816.5-821/861.5-866 MHz portion of the band began on September 20, 2010. If a licensee and Sprint Nextel did not negotiate and submit to the TA an FRA by the end of the negotiation period on December 20, 2010, they entered mediation.

The mediation period for Puerto Rico licensees began on December 21, 2010. As of December 31, 2011, of the eight mediation dockets opened for Puerto Rico licensees, seven mediation dockets had been resolved (an increase from six resolved as of September 30, 2011). The licensee in one mediation docket had negotiated a PFA, was still in planning, and had not yet submitted a cost estimate to Sprint Nextel.

As of December 31, 2011, six FRAs (86 percent) were submitted to the TA out of the seven FRAs anticipated for Puerto Rico licensees that must be reconfigured from 816.5-821/861.5-866 MHz. The TA has approved six FRAs with a contract value, including amendments, totaling approximately \$663,821. Appendices 2 and 3C provide additional information.

b. **Reconfiguration Implementation**

The PSHSB required high-site licensees clearing the ESMR band to complete reconfiguration by September 20, 2011 and all Puerto Rico licensees to complete reconfiguration by March 19, 2012.

As of December 31, 2011, there was one FRA for which a Puerto Rico licensee that must be reconfigured from 816.5-821/861.5-866 MHz had completed its physical retune and transitioned to its new channels. As of December 31, 2011, physical retuning was complete for 14 percent of these FRAs.

⁵² See Third Report and Order, 25 FCC Rcd at 4447 ¶ 12.

⁵³ See 800 MHz Transition Administrator, LLC, "Implementation Timetable for the Reconfiguration of the 800 MHz Band in Puerto Rico," WT Docket No. 02-55, at 12 (filed Aug. 20, 2010).

As of December 31, 2011, there were two FRAs for which Puerto Rico NPSPAC licensees had completed their physical retunes and transitioned to their new channels. As of December 31, 2011, physical retuning was complete for 33 percent of Puerto Rico NPSPAC FRAs.

6. ESMR Band Licensees

There are some non-border high-site licensees located in the ESMR Band (817-821/862-866 MHz) that are required to relocate to frequencies in the non-ESMR band below 816/861 MHz. The TA placed these licensees on the same schedule for FRA negotiations and mediation as the Puerto Rico licensees. As of December 31, 2011, all of the five mediation dockets opened for ESMR Band licensees had been resolved. As of December 31, 2011, the one FRA anticipated for an ESMR Band licensee was submitted to the TA. Appendix 3C provides additional information.

7. U.S. Virgin Islands

The 12-month transition period for completion of rebanding in the U.S. Virgin Islands ("USVI") began on March 21, 2011 and ended on March 20, 2012. The PSHSB's *Fourth Report and Order* and February 18, 2011 Public Notice established timelines for planning, negotiation, and implementation for USVI licensees.⁵⁴

Channels 1-120 have been cleared of incumbent site-specific licensees and there are no NPSPAC licensees to retune in the USVI. The remaining reconfigurations are for a small number of high-site incumbent licensees that need to relocate out of the 816.5-821/861.5-866 MHz portion of the band and for EA licensees.

a. **Negotiations**

For USVI licensees that had not completed FRA negotiations, the PSHSB established a 90-day mandatory negotiation period to complete planning and negotiations, which began on March 21, 2011. The mediation period for USVI licensees began on June 21, 2011. As of December 31, 2011, the one mediation docket opened for the USVI had had been resolved.

As of December 31, 2011, the one FRA anticipated for a USVI licensee that must be reconfigured from 816.5-821/861.5-866 MHz was submitted to the TA. The TA has approved one FRA with a contract value, including amendments, totaling approximately \$27,600. Appendix 3C provides additional information.

b. **Reconfiguration Implementation**

The PSHSB required high-site licensees clearing the ESMR band to complete reconfiguration by September 20, 2011 and all USVI licensees to complete reconfiguration by

_

⁵⁴ See Fourth Report and Order; see "Public Safety and Homeland Security Bureau Announces that the 12-Month Transition Period for 800 MHz Band Reconfiguration in the United States Virgin Islands (Region 48) will Commence on March 21, 2011," *Public Notice*, 26 FCC Rcd 1948 (2011).

March 20, 2012. As of December 31, 2011, there was one FRA for which a USVI licensee that must be reconfigured from 816.5-821/861.5-866 MHz had completed its physical retune and transitioned to its new channels. As of December 31, 2011, physical retuning was complete for 100 percent of these FRAs.

8. Change Notices and Amendments

When a licensee encounters an emergency or unforeseeable need to change the scope or cost of its planning or reconfiguration implementation activities after it has signed its TA-approved PFA or FRA, it must submit a Change Notice to Sprint Nextel and the TA. Change Notices generally seek modifications to the services and equipment provided for in the PFA or FRA and the associated costs. The TA encourages licensees to use the Change Notice Form available on the TA's website when submitting a Change Notice. Licensees and Sprint Nextel negotiate the Change Notice and, in most cases, submit an amendment to the PFA or FRA to the TA for review and approval.

During the fourth quarter of 2011, licensees submitted 76 Change Notices. Some Change Notices are resolved quickly, but others can take time to negotiate and result in an amendment. In some cases, the TA uses the mediation process to assist licensees and Sprint Nextel in reaching agreement on Change Notices.

Most Change Notices result in an amendment to the licensee's PFA or FRA. During the fourth quarter of 2011, licensees and Sprint Nextel negotiated and submitted to the TA five PFA amendments and 73 FRA amendments.

B. Program Financial Information

This section provides information for the fourth quarter of 2011 regarding reconfiguration expenditures, the Letter of Credit, the external audit, the TA's fees and expenses, and the closing process and reconfiguration Completion Certifications.

1. Reconfiguration Expenditures

a. 800 MHz Incumbent Licensee Reconfiguration Costs

As of December 31, 2011, Sprint Nextel and incumbent licensees had executed FRAs and PFAs pursuant to TA-approved cost estimates, as adjusted to reflect TA-approved actual costs, totaling approximately \$1,083.0 million, and Sprint Nextel had paid approximately \$690.6 million of this amount as both advance payments and for work completed to date. This compares to \$1,044.9 million in executed FRAs and PFAs and \$662.0 million paid as of September 30, 2011.

Sprint Nextel has reported to the TA that, as of December 31, 2011, it had incurred, on a cash basis, approximately \$1,559.9 million in costs for: (1) payments made to incumbent

⁵⁵ The form is available at http://www.800TA.org/content/resources/Change Notice Form.doc.

licensees or their vendors in accordance with TA-approved agreements executed by incumbent licensees and Sprint Nextel; and (2) replacement equipment costs, including costs related to the development of software for certain incumbent licensee subscriber equipment that enables such subscriber equipment to be retuned rather than replaced and costs related to replacement equipment to be provided to incumbent licensees by Sprint Nextel (collectively "800 MHz Incumbent Licensee Reconfiguration Costs"). To date, Sprint Nextel had requested that the TA assess approximately \$727.9 million of the 800 MHz Incumbent Licensee Reconfiguration Costs (submitted as of December 31, 2011) for the purpose of determining whether those costs are creditable against the payment Sprint Nextel will make to the United States Treasury at the completion of reconfiguration ("Creditable Costs"). The status of these costs is as follows:

- \$624.8 million is determined by the TA to be Creditable Costs pending the Final Accounting to be performed at completion of reconfiguration and the results of the external audit.
- The remaining \$103.1 million requires additional information from Sprint Nextel or incumbent licensees to determine whether these costs are creditable.

Sprint Nextel has not submitted the remaining \$832.0 million of the 800 MHz Incumbent Licensee Reconfiguration Costs, which consists primarily of payments for replacement radios and other equipment, to the TA for credit assessment or for external audit.

b. **Sprint Nextel Costs**

Sprint Nextel has reported to the TA that, as of December 31, 2011, it had incurred, on a cash basis, approximately \$324.2 million in costs to support: (1) incumbent licensee negotiations; (2) systems development costs for tracking and reporting of program activity, (3) Sprint Nextel's program and financial management activities; (4) other program costs; and (5) reconfiguration of Sprint Nextel's systems in the 800 MHz band (collectively "Sprint Nextel Costs"). The Sprint Nextel Costs exclude certain amounts incurred related to Sprint Nextel's internal network costs that Sprint Nextel may submit for credit at a later date ("To Be Determined Sprint Nextel Costs"). To date, Sprint Nextel has requested that the TA assess approximately \$259.2 million of the Sprint Nextel Costs (submitted as of September 30, 2011) for the purpose of determining whether those costs are Creditable Costs. The TA has performed a review of approximately \$256.2 million in costs (submitted as of September 30, 2011). The status of these costs is as follows:

- \$199.7 million was determined by the TA to be Creditable Costs pending the Final Accounting to be performed at completion of reconfiguration and the results of the external audit.
- The remaining \$56.5 million requires additional information from Sprint Nextel to determine whether these costs are creditable.

Sprint Nextel has not submitted the remaining \$65.0 million of the Sprint Nextel Costs or any of the To Be Determined Sprint Nextel Costs to the TA for credit assessment or for external audit.

c. 1.9 GHz Clearing Costs

On October 5, 2011, Sprint Nextel filed with the FCC its Schedule of Costs Expended in Connection with Clearance of the 1.9 GHz Band for the 10 months ended October 31, 2010 and for the inception-to-date period from January 1, 2005 to October 31, 2010, in which it reported approximately \$730.0 million in costs expended to clear the 1.9 GHz band. Subsequently, Sprint Nextel has reported to the TA that, as of December 31, 2011, it had incurred approximately \$745.6 million in costs, on a cash basis, associated with reconfiguration of the 1.9 GHz band from the inception-to-date period January 1, 2005 to December 31, 2011. Pursuant to the *Report and Order* and the September 29, 2010 Fifth Report and Order, Sprint Nextel is entitled to seek reimbursement from Mobile Satellite Service ("MSS") licensees and Advanced Wireless Services entrants for their *pro rata* portion of the costs to clear the 1.9 GHz spectrum. As of December 31, 2011, Sprint Nextel received approximately \$135 million in reimbursements from the MSS entrants in the fourth quarter of 2011, which satisfies all the reimbursements Sprint Nextel expects to receive. These costs are reported for informational purposes only. The TA does not conduct an analysis of these costs.

d. Estimated Total Reconfiguration Expenditures

On February 27, 2012, Sprint Nextel filed with the Securities and Exchange Commission ("SEC") its Annual Report on Form 10-K for the fiscal year ended December 31, 2011 and disclosed that its total payments directly attributable to its performance under the *Report and Order*, from the inception of the program through December 31, 2011, are approximately \$3.1 billion, of which \$252 million was incurred during 2011, before any reimbursements from the MSS entrants.⁵⁹

2. Letter of Credit

For the quarter ended December 31, 2011, Sprint Nextel made its required payments to licensees and vendors. Accordingly, there has been no need to draw on the Letter of Credit through December 31, 2011. Sprint Nextel has reported to the TA that, as of December 31, 2011, it had incurred, on a cash basis, approximately \$206.0 million in Letter of Credit Fees.

The TA has continued to monitor the amount of the Letter of Credit in view of Sprint Nextel's programmatic obligations. On October 5, 2011, the TA recommended that the Letter of Credit be further reduced by \$37.7 million based on costs paid through June 30, 2011. The FCC

⁵⁶ See Sprint Nextel Corporation, "Schedule of Costs Expended in Connection with Clearance of the 1.9 GHz Band," at 2, attached to Letter from Trey Hanbury, Sprint Nextel Corporation, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 02-55 (filed Oct. 5, 2011).

⁵⁷ See Report and Order, 19 FCC Rcd at 15099 ¶ 261; see also Improving Public Safety Communications in the 800 MHz Band, Fifth Report and Order, Eleventh Report and Order, Sixth Report and Order, and Declaratory Ruling, 25 FCC Rcd 13874, 13881 ¶ 20 (2010).

⁵⁸ See Sprint Nextel Corporation, Annual Report (Form 10-K), at F-29 (filed Feb. 27, 2012), available at http://www.sec.gov/Archives/edgar/data/101830/000010183012000015/sprint201110-k.htm.

⁵⁹ See id. at 47.

concurred with the TA's request on October 12, 2011, and the Letter of Credit was reduced from \$1.061 billion to \$1.023 billion. On December 22, 2011, the TA recommended that the Letter of Credit be further reduced by \$42.2 million based on costs paid through September 30, 2011. The FCC concurred with the TA's request on January 3, 2012, and the Letter of Credit was reduced from \$1.023 billion to \$980.7 million.

3. External Audit

In the fourth quarter of 2011, Reznick Group, the external auditors selected by the TA, continued certain activities for the annual audit of program expenditures for the year ended December 31, 2011 and for the period from inception (August 6, 2004) through December 31, 2011 ("the 2011 Audit"). As discussed previously, certain 800 MHz Incumbent Licensee Reconfiguration Costs and Sprint Nextel Costs have not been submitted by Sprint Nextel to the TA for credit assessment or for external audit. Accordingly, these costs may be included in a subsequent period audit.

4. <u>Transition Administrator</u>

a. Fees, Expenses, and Staffing

The TA's fees and expenses for the quarter ended December 31, 2011 were approximately \$6.78 million in fees and \$0.13 million in expenses, for a total of approximately \$6.91 million, which is \$0.19 million less than the forecast for the fourth quarter. Additional details are provided in Appendix 10. TA staffing as of December 31, 2011 consisted of 52 Full Time Equivalents ("FTEs").

The TA's fees and expenses for the quarter ending March 31, 2012 are estimated at \$7.2 million in fees and \$0.2 million in expenses, for a total of \$7.4 million.

b. **Disclosure of Non-Reconfiguration Fees**

In accordance with the TA's Independence Management Plan, the TA reports that Deloitte Consulting LLP, a subsidiary of Deloitte LLP, received \$1.77 million from Sprint Nextel in non-TA fees and costs for the quarter ended December 31, 2011; other member firms of Deloitte LLP did not receive any non-TA fees and costs for the quarter ended December 31, 2011.⁶⁰

_

⁶⁰ See "Independence Management Plan for 800 MHz Transition Administrator Team Members (Version 1.4)," at 4, attached to Letter from Robert B. Kelly, Squire, Sanders & Dempsey (US) LLP, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 02-55 (filed Apr. 21, 2011). As used in this context, other member firms of Deloitte LLP means Deloitte & Touche, LLP, Deloitte Financial Advisory Services, LLP, or Deloitte Tax, LLP, each a subsidiary of Deloitte LLP. Please see http://www.deloitte.com/us/about for a detailed description of the legal structure of Deloitte LLP and its subsidiaries.

5. Closing Process and Reconfiguration Completion Certifications

While the completion of planning activities or physical reconfiguration activities is an important achievement, licensees and Sprint Nextel must complete all closing process activities in order to complete reconfiguration and perform all contractual requirements in the PFA or FRA. The closing process ensures that the parties have met all of their obligations to each other. For FRAs, the closing process consists of the following activities:

- 1. License Modification The modification of the licensee's FCC licenses to delete old frequencies.
- 2. Equipment Reconciliation The true up of loaned, replaced, and replacement equipment.
- 3. Actual Cost Reconciliation The true up of cost support with amounts paid or to be paid by Sprint Nextel.
- 4. Closing The preparation, execution, and delivery of the closing documents, including an FRA Completion Certification.

During the ACR process, a licensee provides Sprint Nextel with supporting documentation for the actual costs incurred for its planning or reconfiguration, and Sprint Nextel validates the costs incurred and performs a true-up of the actual costs as compared to the estimated costs in the PFA or FRA. The result is an ACR Statement documenting the actual costs incurred and payments made to the licensee, including final amounts due from or to the parties. Licensees owed additional funds by Sprint Nextel will generally not be paid those amounts until the ACR statements have been executed by both the licensee and Sprint Nextel.

Once the ACR Statement is complete, Sprint Nextel sends the licensee closing documents, including a Completion Certification. A licensee is required by its PFA or FRA to execute and return the closing documents to Sprint Nextel. It is important for licensees and Sprint Nextel to complete these activities in a timely manner. Failure to conduct closing activities in a timely manner can result in significant program delays, lost or misplaced actual cost support documentation, and other issues that could substantially impact amounts owed from or due to Sprint Nextel.

In the Actual Cost Reconciliation Fact Sheet, which is posted on the TA's website, the TA provides specific timeframes by which licensees and Sprint Nextel should complete ACR and other closing activities. To minimize the effort and times associated with the closing process, licensees should also review the following TA guidance:

- The Change Notice Process Fact Sheet;
- The Incumbent Labor Reimbursement Policy; and
- The Reconfiguration Completion Checklist.

Each of these documents is available on the TA's website at www.800TA.org. In addition, Webinars (online training seminars) regarding closing process topics, such as ACR and

Reconfiguration Completion, to assist licensees in understanding the key activities in the process may be found on the TA's website at http://www.800TA.org/content/ipswebinars.

As outlined in Table 4 below, there continue to be delays between the time licensees complete physical reconfiguration activities and the closing of the FRA.⁶¹ For those FRAs that have closed as of December 31, 2011, the closing process has taken an average of 11.7 months to complete following the completion of physical reconfiguration activities, compared to an average of 11.6 months through September 30, 2011. For those licensees that have completed physical reconfiguration activities but have not closed the FRA as of December 31, 2011, an average of 20.9 months has elapsed since the completion of physical reconfiguration activities compared to an average of 20.2 months as of September 30, 2011.

Table 4: FRAs in the Closing Process by Pending Activity⁶²

	Length of Time Pending Activity Open													
Pending FRA Activity to be Completed	Quantity of FRAs	Less than 3 Months	3 to 6 Months	6 to 9 Months	9 to 12 Months	12 Months or Longer	% Greater than or Equal to 12 Months							
Equipment Reconciliation	91	23	8	11	8	41	33.6%							
License Modification	1	1	0	0	0	0	0.0%							
Actual Cost Reconciliation Process*	221	51	33	27	33	77	63.1%							
Closing	20	14	1	0	1	4	3.3%							
Total FRAs Pending in Closing Process	333													
Closed FRAs**	1,265													
Total FRAs for which physical reconfiguration activities are complete***	1,598													

^{*} Includes 30 FRAs that are also pending License Modification.

During the quarter ended December 31, 2011, 22 PFA Completion Certifications, which indicates that work required to plan for the reconfiguration has been completed and parties have agreed on sums paid, were submitted to the TA, increasing the total submitted over the life of the program to 370.⁶³ Of these, the TA reviewed and found 367 PFA Completion Certifications

^{**} Includes 9 FRAs that are pending TA review of the TA Completion Certifications.

^{***} Includes 19 FRAs without infrastructure to reconfigure that have closed or are pending closing.

⁶¹ The completion of all physical reconfiguration activities includes the completion of physical retuning and, where applicable, completion of the "second touch." The completion of physical retuning means the individual licensee has retuned its infrastructure to operate on its replacement frequencies and has cleared its old frequencies. Completion of the "second touch" means that the licensee, if provided for in the FRA, has completed a second (or subsequent) touch of its subscriber units to remove the pre-rebanding channels.

⁶² This table is created from data provided by Sprint Nextel and collected by the TA directly from licensees.

⁶³ Of these, 45 were for Stage 1 licensees and 325 were for Stage 2 licensees.

sufficient, subject to post-close audit adjustments, with the remaining three under review as of December 31, 2011. Of the 565 PFAs that have been executed between licensees and Sprint Nextel, approximately 34.5 percent of executed PFAs remain open as of December 31, 2011. Appendix 8 contains a summary of PFAs that have closed, and Appendix 9 contains a listing of PFAs that have not closed as of the end of the fourth quarter.

The FRA Completion Certification certifies that the licensee has relinquished its original 800 MHz frequencies and reconfigured its facilities to operate on replacement frequencies; that all reconfiguration work required has been satisfactorily completed; and that the licensee and Sprint Nextel have agreed on the amount paid by Sprint Nextel for such work. A licensee's reconfiguration is not complete until this certification has been executed and delivered by the licensee to Sprint Nextel.

During the fourth quarter of 2011, 22 FRA Completion Certifications were submitted to the TA, increasing the total submitted over the life of the program to 1,265.⁶⁴ Of these, the TA reviewed and found 1,256 FRA Completion Certifications sufficient, subject to post-close audit adjustments, with the remaining nine under review as of December 31, 2011. Of the 1,970 FRAs that have been executed between licensees and Sprint Nextel, approximately 35.8 percent of executed FRAs remain open as of December 31, 2011. Appendix 8 contains a summary of FRAs that have closed. Appendix 9 contains a listing of FRAs for which physical reconfiguration activities are complete but the FRA has not closed as of the end of the fourth quarter.

The TA reviewed the amounts expended on activities for the above-referenced PFAs and FRAs, pending any results of the TA's post-close review rights or external audit, to determine (1) that the amounts paid by Sprint Nextel do not exceed TA-approved contract amounts, and (2) that the reconciliation ("true-up") of any additional amount due to the licensee or its vendor or any refund due Sprint Nextel, as determined by Sprint Nextel and the licensee, is properly reflected in the 800 MHz accounting records and is consistent with payments made. The TA will continue to monitor the closing process, and make inquiries of licensees and Sprint Nextel, to facilitate adherence to the timelines and guidance.

C. Specialized Support Functions

This section outlines additional information about TA activities that support the program, such as the Contact Center, the website, outreach, and FRA review.

To facilitate successful 800 MHz band reconfiguration, licensees and other stakeholders must have rapid and consistent access to accurate reconfiguration information, processes, and procedures. As such, the TA executes an approach that is intended to engage, educate, and equip the impacted stakeholders with the knowledge necessary to plan and implement reconfiguration activities. The TA employs a multi-pronged approach, including direct calling campaigns, conference and event attendance ("Stakeholder Outreach"), Webinars (online training seminars), and interaction with industry press to accomplish these goals.

⁶⁴ Of these, 909 were for Stage 1 licensees and 356 were for Stage 2 licensees.

1. Stakeholder Inquiries

The TA maintains a "Contact Center" to receive and process questions and requests for information regarding reconfiguration and the TA's activities. The TA receives inquiries from a variety of stakeholders: licensees, vendors, consultants, associations, and the trade press. During the fourth quarter, the TA received a total of 4,665 inquiries to the Contact Center (1 Contact Center (1,438 in October 2011; 1,388 in November 2011; and 1,839 in December 2011).

Several parties have contacted the TA regarding possible investment opportunities in 800 MHz band spectrum following reconfiguration. The TA has no role in the allocation of frequencies following the completion of the 800 MHz band reconfiguration. The TA does not provide advice on investments, acquisitions, or usage of licenses in the 800 MHz band. Parties interested in such matters may wish to consult the FCC's rules and regulations and visit the FCC's website at http://transition.fcc.gov/pshs/public-safety-spectrum/800-MHz/ and http://transition.fcc.gov/pshs/public-safety-spectrum/800-MHz/ and http://transition.fcc.gov/pshs/public-safety-spectrum/800-MHz/ and http://transition.fcc.gov/pshs/public-safety-spectrum/800-MHz/ and http://transition.fcc.gov/pshs/public-safety-spectrum/800-MHz/ and http://transition.fcc.gov/index.htm; job=wt_investment_scams.

2. TA-Produced Materials, TA's Website, and Outreach Activities

During the fourth quarter, the TA continued to distribute informational materials to stakeholders relating to the reconfiguration process, including fact sheets, licensee forms, direct mailings, and other materials as listed below. Many of these items are posted on the TA's website (www.800TA.org).

- Website Updates The TA posted information about the FCC's Orders regarding non-border and Canadian Border Region licensees filing requests for waiver of their respective rebanding completion deadlines.
- Cost Metrics The TA published monthly updates to the FRA Cost Metrics, which are a set of metrics comprised of licensee reconfiguration implementation costs and rates, based on system size.

These new or modified materials, in addition to materials previously published, are intended to provide stakeholders with sufficient information to effectively plan, negotiate, and implement reconfiguration.

The TA's website is a significant component of the Stakeholder Outreach efforts. During the fourth quarter, updates were made to the TA's website to post and advertise new and updated TA-produced materials and guidance for licensees and to post copies of FCC Public Notices and Orders. The TA's website received an estimated 7,583 visits during the fourth quarter. 65

⁶⁵ The TA has adopted "visits" instead of "hits" as a more accurate metric to utilize in identifying unique website traffic.

3. Frequency Reconfiguration Agreement Review

The TA continues to meet its service-level goals for reviewing FRAs. ⁶⁶ Detailed information about the time required by the TA to review and approve Stages 1 and 2 FRAs submitted to the TA is available in Appendices 6 and 7.

 $^{^{66}}$ The TA's service-level targets for FRA review are review of 80 percent of FRAs within 5 business days, 95 percent within 10 business days, and 100 percent within 15 business days.

III. APPENDICES

Appendix 1A

Status of Reconfiguration for Non-Border Licensees in Channels 1-120: Milestones Completed by Number of Frequency Reconfiguration Agreements, Per Wave, Per Region, as of December 31, 2011

Notes

- * Data includes call signs in the U.S.-Mexico border region. Data may change depending upon the border area band plan.
- a. Data for Channels 1-120 call signs does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.
- b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRÅ), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- c. Data includes call signs with fixed locations authorized for frequencies in the 851-854 MHz range with adequate geographic data to determine a Public Safety Region.
- d. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- e. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- f. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Notes

- * Data includes call signs in the U.S.-Mexico border region. Data may change depending upon the border area band plan.
- a. Data does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.
- b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- c. Data includes call signs with fixed locations authorized for frequencies in the Expansion Band with adequate geographic data to determine a Public Safety Region.
- d. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call signs. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- e. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- f. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Notes:

- * Data includes call signs in the U.S.-Mexico border region. Data may change depending upon the border area band plan.
- a. Data does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.
- b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- c. Data includes call signs with fixed locations authorized for frequencies in the 866-869 MHz range, and those with adequate geographic data to determine a Public Safety Region.
- d. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- e. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- f. As of the second quarter of 2007, the NSPAC call sign data includes STA NPSPAC call signs and call signs without fixed locations (e.g., mobile-only authorizations).
- g. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Notes:

- a. Data for the Southeast ESMR Band call signs does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.
- b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- c. Data includes call signs with fixed locations authorized for frequencies in the Southeast ESMR Band with adequate geographic data to determine a Public Safety Region.
- d. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- e. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- f. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Appendix 2

Status of Reconfiguration for Licensees in the ESMR Band:

Milestones Completed by Number of Call Signs, Per Wave, Per Region, as of December 31, 2011

Public Safety Region (PSR)	PSR Name	Updated Call Sign Population as of 12/31/11	Nextel Initiated	Sprint Nextel and Licensee Reach Pre- Contract Agreement	Sprint Nextel Submits Frequency Reconfiguration Agreement to TA	TA Approves Frequency Reconfiguration Agreement	Through 12/31/11 Call Signs with Reconfiguration Applications Submitted to FCC	Through 12/31/11 Call Signs with Reconfiguration Applications Granted	Sprint Nextel Clears Frequencies	Incumbent Clears Frequencies	Through 12/31/11 Call Signs with Surrender Applications Submitted to FCC	Through 12/31/11 Call signs with Surrender Applications Granted
							Number of Call S	signs				
Wave 1	Subtotal	0	0	0	0	0	0	0	0	0	0	0
Wave 2	Subtotal	3	3	3	3	3	3	3	3	0	0	0
4	Arkansas	3	3	3	3	3	3	3	3	0	0	0

47	Puerto Rico	36	34	34	34	34	7	7	22	1	1	0
48	US Virgin Islands	5	5	5	5	5	5	5	2	2	7	2
Wave 4	Subtotal	0	0	0	0	0	0	0	0	0	0	0
Total for Wa	ves 1-4	44	42	42	42	42	15	15	27	3	8	2

Notes:

- a. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- b. Data includes call signs with fixed locations authorized for frequencies in the ESMR Band with adequate geographic data to determine a Public Safety Region.
- c. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.
- d. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.
- e. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Total for Waves 1-4		219	1183	1402				

Note:

⁽a) For Non-Canadian Border PSR 15, a call sign has frequencies in both PSR 15 and PSR 22. The reconfiguration of the frequencies on this call sign in PSR 22 necessitated the reconfiguration of the same frequencies in PSR 15.

Notes:

- a. Data for Channels 1-120 call signs excludes call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts are not going to be submitted to the TA for review and approval for Sprint Nextel credit. Data for Expansion Band call signs excludes call signs under prior contract and call signs for which licensees have elected not to reconfigure.
- b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- c. Data for Channels 1-120 call signs includes call signs with at least one primary fixed location authorized for frequencies the 851-854 MHz range with adequate geographic data to determine a PSR. Expansion Band data includes call signs with at least one primary fixed location in the Expansion Band, as the Expansion Band may be defined inside and outside the Southeast ESMR region, with adequate geographic data to determine a PSR. NPSPAC data includes call signs with fixed locations in the 866-869 MHz range with adequate geographic data to determine a PSR. Southeast ESMR Band data includes call signs with fixed locations in the 858.5-862 MHz range within the Southeast ESMR region and with adequate geographic data to determine a PSR. Call signs with locations in multiple PSRs are counted for each PSR. Call signs are counted within every PSR for which they have a fixed primary location.
- d. Data has been adjusted to reflect the change in the band plan in the Atlanta area pursuant to the FCC's October 5, 2005 Memorandum Opinion and Order.
